K3-海洋生物的探索

EXPLORATION OF MARINE LIFE

**Po Leung Kuk Fiona Cheung Sum Yu Kindergarten**  
**Kindergarten Activity Report**  
**2023-2024 school year**

Class: K3A

Date: 2024-3-15

Activity name: Exploration of marine life

Activity goals:

- Be able to recognize different marine life
- Be able to understand ways to protect the ocean
- Be able to understand the impact of human destruction of the ocean on marine life
- Be able to cultivate an attitude of caring for the ocean

**Activity content and results:**

When children visit the "Wonder of the Ocean", they can see colorful corals and a variety of rare fish, and can even touch coastal creatures (starfish and sea cucumbers). In these two activities, children can get close contact with and understand some creatures that are difficult to come into contact with in daily life, and can effectively improve children's understanding of marine life.

In addition, when participating in the puppet show, children can listen to stories, and play different interactive games. In order to children to understand ways to protect the ocean in an interesting way, such as not throwing garbage into the ocean. Interactive games can effectively deepen children's cognitive memory. The puppet show also uses ocean puppets to inform children about the impact on them when garbage appears in the ocean, so that children can understand the impact of human destruction of the ocean on marine life. Influence. In various activities, some children also begin to reflect on whether they have left garbage on the beach, and some children ask staff how to clean the ocean or seabed. I believe that during the activities, the children gradually develop an attitude of caring for the ocean. .

In this activity, children's interest in exploring marine life can be effectively enhanced, and children can understand different marine life. The methods and attitudes of protecting the ocean have also been positively enhanced. At the same time, children can understand the impact of human destruction of the ocean on marine life. The overall activity can achieve its teaching objectives.

**Suggestion:**

The overall activity was good, but the activity time was a little rushed. It is recommended that the overall time be extended by one hour to allow children

to carry out activities and watch different aquariums.  
Below are photos of children performing a puppet show and touching coastal creatures.
