

Dear Principal and Teachers

I am very thankful of your school for accepting and teaching my son Toor Jeon Singh. These 2 years were great experience for me as well for my child. As Jeon become more active and outgoing with others. He has made more friends among his classmates and schoolmates. It was possible only because of school Principal and Teachers as they take care of students very well in friendly school environment. The school is diversified among their students and teachers. The school holds many activities which a way of interaction between parents and students and teachers.

As I joined these activities, I was able to see interaction between teachers and students and how they take care of individual student. I was happy to able to interact more with Principal as she also joined these activities with us. It shows how well school environment is created by Principal and teachers for their students to be more active and participate in different activities.

I appreciate that I put my son in this school where he was able to make friends differ from his culture and becomes more active and outgoing than before. I am thankful of Principal who fulfills her duty towards students and even participate with them in activities. I am thankful of teachers and school staff who take care of my son and other students.

Thanks & Yours faithfully,

Pinky Toor
